

A reduced temperature cleaner to be used in freezers, cold storage areas or any area where below-freezing temperatures are encountered and cleaning must be done. Can be used manually or through floor scrubbing machines.

Where To Use

Meat plants Dairies Restaurants

Dilution

As is.
1/32: 31°F

Directions

COOL can be diluted with up to 60 parts water depending on the ambient temperature. A determination must first be made as to the room temperature as well as how long the material is going to remain in contact with the surface to be cleaned. Once this determination is made your Simoniz® representative can guide you as to the proper dilution rate.

Technical Specifications

COLOR:..... Transparent	STORAGE(Unopened): . 1 Year @R.T.
FORM:..... Liquid	BIODEGRADABLE:..... Yes
SCENT:..... Solvent	WEIGHT/GAL:..... 7.1
