

OPL Liquid Destainer is a powerful, chlorinated destainer for use in institutional laundries. OPL Liquid Destainer has superior whitening action, stain control, and deodorizing characteristics. OPL Liquid Destainer is designed for use with an on-premise Laundry System. This system delivers consistent and economical destaining performance and ensures proper dilution. Highly effective formula reduces expensive pre-soaking or rewashes. Removes difficult stains on white linen, restores natural whiteness to fabrics. Brightens your laundry by eliminating dull and dingy build-up.

Where To Use

Institutional Laundry Operations	Linen Supply Companies
Nursing Homes	School System
Hospitals	Prison Systems
Hotels	

Dilution and Directions

Light Soil: 2 oz per 100 pounds of laundry.

Medium Soil: 3 oz per 100 pounds of laundry

Heavy Soil: 4 oz per 100 pounds of laundry

Usage rates are affected by soil level, water conditions, and laundry procedures and equipment. Your qualified service representative will provide you with the actual usage rate.
