Dilution

HD Degreasing: 1/10 (12 oz./gallon)
Carpet spotting: 1/32 (4 oz./gallon)
Medium Cleaning: 1/80 (1.5 oz./gallon)
Light cleaning: 1/150 (.75 oz./gallon)

Directions

Carpet Spotting – Spot test to insure color will not be affected. Mist lightly onto carpet, do not saturate. Work spot outward from center with brush. Allow to dry, then vacuum.

General Purpose – Scrape off heavy deposits of grease and grime. Spray on or mop onto surface. Agitate with a soft brush if necessary. Pressure spray or wipe off with soft cloth or chamois.

Parts & Heavy Duty Degreasing – Submerge parts in solution or spray product onto surface with trigger sprayer or pump sprayer. Allow solution to dwell, agitate with brush or broom (floors) and rinse. Always wear rubber gloves if submerging hands in liquid.

Before using clean grease trap of all accumulated grease. Regular treatment will make manual cleaning unnecessary. Recommended treatment is 1 ounce of product in 1 quart of water for each 20 gallons of trap capacity. Apply in the evening when the system is inactive. Allow to remain in the system at least 2 hours or preferably overnight. To clean drains and drain lines dilute 4 ounces of product in 1 quart of water and pour down the drain. Under severe conditions repeated applications may be required. Avoid exceeding recommended dosages.
