Flies	Spiders	Mosquitoes	Brown	Dog Ticks
Fleas	Crickets	Centipedes	Carpet Beetles	
Ants	Small Moths	Cockroaches	Bed Bugs	

Directions

Follow all precautions on back label of can. For flying insects, close all doors and windows and direct the spray upward into the center of the room with a slow sweeping motion. Hold spray for 5-10 seconds for an average size room. Keep the room closed for 15 minutes after spraying. Ventilate the room thoroughly before re-entry. Sweep up and discard fallen insects.

For crawling insects, direct spray on as many of the insects as possible as well as any parts of the room where it is suspected the insects may be harboring. Special attention should be paid to cracks and crevices, under stoves, refrigerators, behind counters etc. See container for more specific directions on other insects.

Bed Bugs, spray mattresses, particularly around tufts and seams. Take beds apart and spray in all joints. Treat baseboards, moldings and floors.. Allow all sprayed articles to dry thoroughly before reuse. After mattress is dry cover with mattress cover and sheet. Do not use mattress without cover. Repeat treatment once a month.

Technical Specifications
