

A heavy-duty, hydrofluoric acid-based, masonry cleaner and restorer that is especially recommended for cleaning heavily soiled surfaces. When used as directed it will remove airborne smoke, oxidation, dirt, industrial stains, efflorescence and carbon stains.

### Where To Use

Clay Bricks	Slate	Unglazed/Unpolished Stone
Fieldstone	Granite	Terra Cotta
Sandstone	Stucco	Concrete

### Dilution

1/3 with water (always add acid to water)

### Directions

RESTORE must be diluted before use to avoid a bleaching effect. Always try a test patch on an unobtrusive panel before using. Dilute 1 part cleaner into 3 parts of water. Starting at bottom, apply diluted RESTORE with low pressure sprayer, a masonry brush or a deep nap synthetic roller. Let stand 3-5 minutes. Rinse with a high pressure spray. Begin rinsing from the top of this section. Depending on the condition of the brick, a second application may be necessary or a slightly stronger solution may be desired.

### Technical Specifications

COLOR: .....Transparent brown	VISCOSITY: .....Water thin
FORM: ..... Liquid	STORAGE(Unopened):...1 Year @R.T.
SCENT: ..... Sharp, irritating	BIODEGRADABLE: ...Yes
pH: ..... < 1.0	WEIGHT/GAL: .....9.0 lbs.
FLASH POINT: None	SHIPPING CLASS: .....8, Packing Gr II
FOAM: ..... Low	PACKAGING: .....5 gal, 55 gal
TYPE: ..... Hydrofluoric Acid Masonry Cleaner
