

# A uniquely hydrophobic proprietary formulation!

**Simoniz Ceramic Sealant** represents a major breakthrough in car wash chemistry. It is the next step in shine and protection from Simoniz Double Bond **Double Bond**...to Body Shine **BODY SHINE**...to Hot Wax **SIMONIZ HOT WAX SHINE**...and now to Simoniz Ceramic Sealant **SIMONIZ CERAMIC SEALANT**.

**Simoniz Ceramic Sealant** combines all three desirable results...shine, protection, and durability. Simoniz has developed a unique molecule that when combined with a ceramic additive and other unique polymers, it creates a highly hydrophobic and durable film. Water will break instantly and run off the vehicle.

Additionally...**Simoniz Ceramic Sealant** carries positively charged ions that attract themselves to the negatively charged surface of the vehicle...attracting itself to the vehicles surface as if it were a magnet.

**Simoniz Ceramic Sealant**...the next best thing in on-line care care protection and performance.
