

**Grip Seal is an anti-slip floor system designed for polished concrete floors, cement based terrazzo floors and broom finished concrete floors. It performs exceptional on new floors that have been damaged that require a durable sealant.**

### Product Description

This unique chemistry becomes a semi- permanent part of the floor. Surfaces treated with GripSeal benefit from increased strength, durability, and reduced efflorescence. GripSeal provides exceptional stain resistant.

The resulting finish is a gloss film that will protect concrete or polished surfaces for many years.

Surfaces protected with GripSeal will have exceptional increased strength and durability.

Excellent base coat for extremely porous VCT floors that can be top-coated with GripCoat

### Advantages & Benefits

- Extends the service life of the floor
- Penetrates and seals existing floors
- Non-yellowing
- Low odor, easy to apply. Fast Drying
- Produces a long lasting, high gloss finish
- Eliminates the need for floor waxes
- Improves chemical and water resistance
- Increases abrasion resistance
- Environmentally friendly — VOC compliant
- Non Flammable. Non-toxic
- Reduces alkalinity / efflorescence
- Helps prevent chloride intrusion
- Increased Slip coefficient
- Better visual appearance of floor
