

*A cherry-scented spray polish that is made to be applied under high pressure. It contains a high level of polymer silicones along with a water beading agent.*

### Where To Use

Self Serve Car Washes      Weather Protection for Houses  
Conveyor Car Washes

### Dilution

1/150 – 1/200

### Directions

Performance is best when product is applied under high pressure (600-1000 psi) with hot or cold water. Dilute at levels above. Spray solution directly on entire vehicle. A light water rinse following the wax application will enhance the shine. Pressure Poly Glaze will not harm or streak window.

### Technical Specifications

COLOR: ..... Opaque Pink	VISCOSITY: ..... Water Thin
FORM: ..... Liquid	STORAGE(Unopened):..1 Year @R.T.
SCENT: ..... Cherry	BIODEGRADABLE: ...Yes
