

*A blend of surface active and penetration agents that cleans, polishes and preserves the original appearance of stainless steel and other hard surfaces. A monomolecular film is formed and absorbed by the treated surface. This film acts as a protective coating that repels dirt and fingerprints and prevents pitting and discoloration. Regular use keeps surfaces looking like new and prolongs equipment life.*

## Where To Use

Stainless Steel	Chrome	Aluminum	Mica
Baked Enamel	Doors	Cabinets	Elevators
Room Dividers	Copper Surfaces	Laboratories	
Kitchen Service Equipment			

## Dilution

As is

## Directions

Safe for use on all surfaces, polished or satin finished. Apply sparingly to a clean, soft cloth. Wipe surface lightly in direction of grain.
