

Blue Wave

Quat-Based

Blue Wave is a **Quaternary Ammonium Chloride** based, water miscible malodor counteractant and deodorizer. Its odor control properties are derived from chemical formulation, which destroys objectionable odors at their base, rather than using heavy perfume masking agents who eventually allow the malodors to reappear when the perfume fragrance has dissipated. It is fast acting and economical.

Advantages:

- Destroys odors where they start
- Quat-based
- Concentrated for economy
- Long-lasting
- Pleasant fragrance
- Can be used directly, damp mopped or with a trigger spray

Properties:

- | | |
|-----------------------|----------------------------------|
| • Appearance and odor | Blue solution with pleasant odor |
| • PH of Concentrate | 7.5 |
| • Specific gravity | 0.99 |
| • Biodegradability | Yes, all surfactants |

Application Instructions:

Use diluted solution at 1 oz.. per 5 gallon of water for normal use. Up to 6 oz. per 5 gallon of water for severe odor problems

Uses:

Public Restrooms	Hospital rooms
Meeting rooms	Schools
Theatres	Zoos
Aircraft	Recreational Vehicles
Locker rooms	
Destroys animal, cooking, smoke and fire odors	
Porta - Potty
