Flush Out

Urine Decontamination Pre-Treatment

Description

Flush Out is a mildly acidic pretreatment designed to dissolve and liquefy urine salts and heavy urine deposits for easier removal by bacterial digestion.

Features & Benefits

- Quickly dissolves urine salts and deposits
- Works as pre-treatment when using our Enzyme based Pet Stainoff

Directions for Use

Mix 1 part of Flush Out with 3 parts of water for routine urine removal jobs. For extremely heavy deposits use full strength.

Liberaly apply solution to contaminated area and allow to dwell for 5-10 minutes. Detergent clean thoroughly and rinse with fresh water or hot water extraction. After cleaning and rinsing, liberaly apply Harvard Pet Stainoff to the affected area to digest any residual material.
